

Solar Solutions ...

... that fit your needs

- MicroFIT-eligible photovoltaic (PV) systems
- Fully licensed electrical contractors providing professional turn-key solar installation services
- Quiet, clean, low-maintenance generation with no carbon dioxide, reducing global greenhouse gases

MicroFIT

The Ontario Power Authority's (OPA) Feed-In-Tariff program offers a premium rate for power purchase to individuals or companies who install and generate renewable energy. MicroFIT refers to projects under 10kW in size from a list of approved, low-impact renewable technologies, such as solar PV. Under this program, the electricity you generate from your solar panels can be sold back to your local utility for 20 years.

Your Solar Package

Your Purchase

SOLAR
SEMICONDUCTOR

Purchase Your Panels

- Solar Semiconductor high quality mono and multi-crystalline PV modules deliver cost-effective and reliable power
- Anodized aluminum alloy frame and tempered glass for rugged protection
- Bypass diodes to minimize effect of partial shading and optimize yield
- Has manufacturing facilities in Ontario

Install Your System

- Zilla® Rac is for both roof and ground mount systems
- Made of recycled aluminum, the racking is lightweight, strong and corrosion resistant
- Zilla® Flashing provides the best protection against roof leaks in the industry
- Manufactured in Ontario

Get Connected To The Grid

- SMA Inverters convert the DC current generated in photovoltaic cells into AC suitable for the grid
- High efficiency – increased output means increased revenue!
- Acts as an intelligent system manager, responsible for yield monitoring and grid management
- Will be manufactured in Ontario in 2011

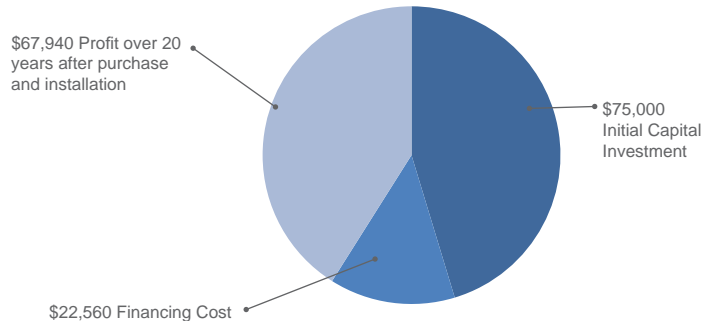

Your Investment

Solar energy is now a sound investment in Ontario. A ground-mounted solar PV system offers you a competitive payback and a great return on investment. For example, a 10kW photovoltaic system purchased at \$75,000, has the potential to earn \$165,500 in revenue payments over 20 years.

Our third party financing package can help cover the up-front costs of purchasing and installing your system. With our exclusive offer of 100% financing up to \$50,000*, you can take advantage of available loans with:

- ♦ no down payment required
- ♦ open for partial or full payment without penalty
- ♦ ammortization of up to 10 years
- ♦ no additional security fees
- ♦ fixed or variable rates

10kW Ground-Mount Solar Installation

Calculations are based on third party bank financing for a \$75,000 10 kW ground-mount solar installation at a variable interest rate of 5.49% over ten years. Estimates have been made as to site conditions, equipment and installation costs. Revenue is calculated based on an OPA microFit contract over 20 years at a power purchase rate of 64.2 ¢/kWh. Power production of 3.5 hours of 10kWh reflecting average climatic conditions for south-central Ontario.

* Subject to a credit application approval

What's Next?

Register With Us

Working with one of our qualified solar professionals, we will provide you with a microFIT-eligible, turn-key solar PV installation service, beginning with a full assessment of your needs. This service is available for a \$150.00 deposit, refunded to you once your Solar PV system is installed.

Book Your Site Assessment

We will work with you to create a solar grid-tied system specific to your needs, taking into consideration factors such as budget, safety requirements and available roof space.

Get Help With Your MicroFIT Application

We will work with you throughout the entire microFIT application process to ensure quick and efficient approval.

Take Advantage of Available Financing

Take advantage of our exclusive financing offer of 100% financing up to \$50,000.

Install Your Solar PV System

Our product package has been carefully selected to ensure you get only trusted, high quality installations. Our manufacturing partners have significant business in North America and they are all Ontario Content Compliant. We have a network of solar installers with proven track records, who stand behind their work.
