Dear Valued Partner,

The situation with coronavirus (COVID-19) continues to evolve and bring new challenges daily across the globe. We are closely monitoring these changes and taking action to help keep our employees safe while remaining focused on servicing our customers.

As of today, all of our manufacturing facilities and distribution centers are operational. We have put in place policies to enable as many people as possible to work remotely. We have also established procedures to help protect the employees who work in our production facilities.

We understand you serve customers who operate across many industries all over the world. We have more than 130 manufacturing, service and distribution centers around the world and are working diligently to help you continue to deliver outstanding service to your customers.

We will continue to monitor the COVID-19 developments and will update you if we anticipate future disruptions in production or distribution. We recommend that all distributors review current inventory levels to be certain they have adequate stock of high running products.

We value our relationship with you, our partner, and will do our best to communicate any changes in a timely fashion so we can all serve our customers during this unprecedented event. Please feel free to reach out to Sandy Syfko, Vice President Strategic Accounts – Sonapar Americas, with any questions or concerns. Thank you for your partnership.

Best regards,

Betty Noonan
